

# A Neuropsychologist's Tale: India to Rhode Island and Back Again

## David Tate

Assistant professor, Department of Psychiatry and Behavioral Medicine, Brown Medical School; visiting research fellow, Department of Radiology, Brigham and Women's Hospital, Harvard Medical School

**Friday, 30 September**  
**NOON**  
**238 HRCB**

David Tate is a BYU alumnus with a doctoral degree in clinical neuropsychology (2003). Tate is also a two-time Field Studies alumnus to India, where he initially developed interests in the cross-cultural issues affecting cognition and human brain development. Recently, he returned to India to develop culturally fair cognitive tests for use in studies of HIV infection. He will be speaking on the benefits of cross-cultural experience in the context of ongoing scientific research.

### International Field Studies Lecture Series

**Fridays, beginning**  
**30 September–November**  
**at NOON in 238 HRCB.**

International Study Programs (ISP) and the David M. Kennedy Center for International Studies are pleased to announce the new International Field Studies Lecture Series. The lectures will highlight past field study students, who conducted research over the past decade since field studies began at BYU. The more senior alumni will often include descriptions of how their original international experience contributed to their further academic achievements, career, and life paths. Topics to be covered will include: ceremonial drumming in Ghana, cross-cultural psychology in India, religious movements in the highlands of Guatemala, and survival strategies of street children in South Africa. It is hoped that this lecture series will not only be interesting and educational, but will also illustrate, for BYU students, the possibilities, and advantages, of conducting cross-cultural field work, as well as to encourage undergraduate research and mentored learning.
